# Good health starts with a healthy mouth

## Make dental visits a priority

One of the first lines of defense in overall health is dental care. Regular dental cleanings can help manage problems throughout the body, such as heart disease, diabetes, and stroke. In fact, a healthy mouth can add 6.4 years to RealAge® life expectancy.¹ The HumanaDental Prepaid plan enables you to take better care of your teeth, and you'll pay less for your dental care doing so.

## Go to MyDentalIQ.com

Take a health risk assessment that immediately rates your dental health knowledge. You'll receive a personalized action plan with health tips. You can print a copy of your scorecard to discuss with your dentist at your next visit.

# Tips to ensure a healthy mouth

- Use a soft-bristled toothbrush
- Choose toothpaste with fluoride
- Brush for at least two minutes twice a day
- Floss daily
- Watch for signs of periodontal disease such as red, swollen, or tender gums
- Visit a dentist regularly for exams and cleanings

# HumanaDental Prepaid HS205 Plan

The HumanaDental Prepaid plans focus on maintaining oral health, prevention and cost-containment. Members may see a primary care dentist as often as necessary. There are no yearly maximums, no deductibles to meet and no waiting periods.

A primary care dentist (PCD) may decide that a member needs to see a contracted dental specialist. No referral is necessary to see a network specialist.

**Specialists services:** Should members need a specialist, (i.e., endodontist, oral surgeon, periodontist, pediatric dentist), they may be referred by a participating general dentist, or members can self-refer to any participating specialist.

# Summary of services

Services marked with a single asterisk (\*) below also require separate payment of laboratory charges, not to exceed \$200. The laboratory charges must be paid to the plan dentist in addition to any applicable copayment for the service.

## Be healthy

Good oral health means more than just an attractive smile. Research shows that oral health, preventive care and regular visits to the dentist is integral to overall health. For example, the Academy of General Dentistry says there is a link between gum disease and heart problems, and the American Academy of Periodontology says severe gum disease can increase blood sugar, increasing the risk among diabetics. The HumanaDental Advantage Plus plan enables you to take better care of your teeth, and you'll pay less doing so.

Non-participating dentists can bill you for charges above the amount covered by your HumanaDental plan. To ensure you do not receive additional charges, visit a participating PPO Network dentist. Members and their families benefit from negotiated discounts on covered services by choosing dentists in our network. If a member visits a participating network dentist, the member will not receive a bill for charges more than the negotiated fee for covered services. If a member sees an out-of-network dentist, coinsurance will apply to the usual and customary charge. Out-of-network dentists may bill you for charges above the amount covered by your dental plan.
